

NORTH TEXAS SECTION—e-NEWSLETTER

May 2010

Volume 22, Number 3

Dinner Meeting

Date: Thursday, May 20, 2010

Location: Texas Star
Eules, Texas

Speakers: Michael Graves, PE (CP&Y, Inc.)
Paul Bounds (Fort Worth Water
Department)

Topic: Operator Friendly and Intelligent
Security Measures

Meeting Agenda: Social hour - 5:30
Dinner - 6:30
Introductions - 7:00
Section Announcements -
7:15
Program - 7:30 - 8:30

Costs: \$20 Members
\$10 Spouses & Guests

Meeting Sponsors:

**CP&Y, Inc.
Halff**

**Perkins Engineering Consultants, Inc.
WWaterTech, Inc.**

Please RSVP to Holly Ingram at
hingram@cpyi.com
by Thursday, May 13, 2010.

Operator Friendly and Intelligent Security Measures

Many security projects at treatment facilities and associated satellite facilities (pump stations, tank sites, etc.) often are limited to a few locks, cameras, and card readers.

New technologies that are currently being implemented in the industry have significantly higher levels of intelligence and provide a significantly more robust security system.

This presentation will discuss how smart security systems are now being deployed at treatment facilities that improve protection of the operators and the facilities without unduly distracting operators from their main duties of running the plant.

Major topics that are covered in the presentation include:

1. Basic components and operation of an intelligent video system;
2. How to evaluate the need for an intelligent video system;
3. How to layout an intelligent perimeter monitoring system;
4. Intelligent video systems for satellite facilities; and,
5. Emerging technologies for intruder deterrence.

MESSAGE FROM THE PRESIDENT

Well here it is my final Presidential message. As most of my predecessors have said, "I can't believe it has already been a year." Then again, what a year it has been! First let me thank everyone that has worked so hard to support me during my term. The WEAT-NTS officers and committee members are truly some of the hardest working people I have

ever had the pleasure of being associated with. They are dedicated to their professions, to WEAT and most importantly to the members of our fantastic organization. It's not that I am going to really miss the countless emails, phone calls and meetings, but I am going to miss the comraderie that we have built over the past few years. I will certainly carry with me the fond memories and friendships that have developed while working with these fine professionals. I hope that you all have found this past year to be a little different. Hopefully, you had some fun along the way and most importantly were able to learn a little more about our industry. We have a really good thing going here in the North Texas section and I proudly pass the torch of leadership with the utmost confidence in you all to continue advancing this organization...Now just don't screw it up!

Highlighted in this newsletter - and thanks to Holly Ingram, what a great newsletter it is - are some of our many accomplishments. Jeff Sober and Darryl Corbin cannot get enough credit for putting together our super successful sporting clay shoot. Gilbert Trejo worked tirelessly in planning the February Seminar resulting in record attendance and profit levels. The TRA CReWSers held on to their title as State Champions in a strongly contested Operations Challenge Competition and the Daryl Hall Scholarship fund is now endowed and will support our first scholarship this fall. Several years ago, Jody Zabolio, then WEAT-NTS president and current WEAT president, contacted me about providing seed money raised during the February seminar to start the Daryl Hall Scholarship Fund. I was honored by the gesture and the entire Hall family was brought to tears with the thoughtfulness of our organization. I will forever be grateful to WEAT-NTS and our members for their kindness to his family. Whether it has been honoring Daryl's

name with a scholarship or participating in his annual golf event to support his children's dream of attending college, we have made a difference in the life of his family and they are truly grateful for all that we have done.

Thursday May 20th will be our next dinner meeting. Erin Flanagan, WEAT-NTS Vice President has done a great job all year of finding interesting, relevant dinner meeting topics. This month, Michael Graves of CP&Y and Paul Bounds from the Fort Worth Water Department will speak on Operator Friendly and Intelligent Security measures. We will also be accepting nominations and electing our leadership positions for the 2010/2011 term. Be sure to get your reservations in soon. This meeting should be well attended.

Amy Robinson graciously accepted the challenge of running this year's science fair. She recruited several volunteers from our area and by all reports the judges were very impressed with the technical complexity of the projects. We have invited the winners along with their projects to attend the May dinner meeting. Be sure to take a moment to look them over. After all, these kids are the future engineers and analysts of our industry.

Matt Jalbert, a past WEAT-NTS scholarship recipient, has volunteered to assist David Jackson on the scholarship committee. Matt is currently employed by Freese and Nichols as an EIT. It is great to see past recipients' giving back. Be sure to look for announcements on the scholarship applications in this newsletter. Additionally, Phil Spitzer has agreed to chair the newly formed Awards Committee. This committee will work closely with members in our section to nominate and develop the award packages to WEAT. Yes, I am a little biased, but I believe I speak truthfully when I say our section is chock-full of some of the best and brightest in our industry. Phil's challenge will be to assist our worthy members through the nomination process and to make sure that those deserving of recognition are nominated for awards. Contact Phil if you are interested in assisting him in this endeavor, I am sure he will not turn down your help.

Speaking of people deserving recognition, I am going to brag for a moment on a very special person in my life. My sainted mother, Susan, was just awarded the

President's Message continued

first ever "Spirit of Women Employee Award" by Hugely Hospital, recognizing her for outstanding service to the hospital and for going above and beyond her call of duty. Frankly, she has deserved more accolades than can ever be bestowed on one person for the countless hours she has spent as a judge, jury, referee, counselor to hoards of teenagers, maid, cook, chauffeur, veterinarian, cheerleader, Den Mother, motivational speaker and inspirational leader not to mention, she managed to raise my brother and me without going completely insane... Happy Mother's Day to all of you wonderful mothers out there and especially to you Mom!

Bennett Out!

North Texas Operations Challenge Teams Bring Home Four First Place Trophies

After the dust cleared on April 15, 2010 in Corpus Christi, the Dallas AquaTechs and TRA CReWSers walked away with four of the six first place trophies at the 22nd Annual WEAT Operations Challenge Competition. The TRA CReWSers won an unprecedented 13th State Championship by winning first place in two of the five competition events and second in the remaining three. The Dallas AquaTechs claimed a first place trophy in one of the five events and highly competitive third place finish overall.

TRA CReWSers

The Operations Challenge, sponsored by WEAT and WEF, requires teams to compete in five events: Process Control, Laboratory, Collection Systems, Safety, and Pump Maintenance. This year posed a challenge for all four of the teams competing due to the pump maintenance and laboratory events being brand new. The competition this year proved to be extra tough, with all four teams taking home at least one first place.

For the first time this year, the Maintenance Event judges completed a demo run of the event which was graded by the Ops Challenge Teams. The judges team, titled "Megan Martin's Engineering All-Stars" consisted of: Dawn Anderson (Coach), Megan Martin (Team

From left to right, front to back: Megan Martin, Erin Flanagan, Jared Schmerse, Dawn Anderson, Scott Long, and Alan Swartz

Captain), Alan Swartz (Winch Operator), Jared Schmerse (Submersible Pump) and Erin Flanagan (Mixer). They put together an impressive time and drew a large crowd. The camaraderie displayed among the event judges and the teams was a spectacular display, and really added to the competition. This is the first time that any of the judges have publicly performed any event. According to Dawn Anderson, "the judges had a great time preparing for their demonstration and we definitely learned just how hard the teams prepare for competition. It gave us even more respect for them." More importantly, it provided the judges with firsthand knowledge of the event and helped to insure that a first year event ran very smoothly. All of the judges should be applauded for their efforts.

The Dallas AquaTechs brought home the first place trophy in the AECOM Collection Systems Event, one of the most exciting

Dallas AquaTechs

events to watch. Their composite time was over 12 seconds faster than second place winner TRA CReWSers. Not to be outdone, the TRA CReWSers brought home the first place trophies for the Walter Chiang Maintenance Event and the Carollo Safety Event. Dale Burrow from TRA also took home the coveted David Barber Spirit Award for exemplary sportsmanship and conduct.

The four Texas Teams continue to be the most recognizable and competitive teams at the national competition at WEFTEC. This year, WEAT will send all four Texas teams, including the City of Austin Dillo Xpress and the San Antonio Water System Power SAWS to the national competition in New Orleans, La. Both the North Texas Teams will compete for the Division I National Title, which the TRA CReWSers won last year. Competing for the TRA CReWSers is: Patrick Lynn (Coach), Dale Burrow (Team Captain), David Brown, Steve Price,

continued from page 4

and Jake Burwell. Competing for the Dallas AquaTechs is: Eric Rivera (Coach), Rey Davila (Team Captain), Thai Nguyen, Kevin Willey, and James Ray.

The WEAT Operations Challenge Committee would like to thank John Bennett for his outstanding leadership and vision over the last seven years. This year, John Bennett steps down as the PWO representative and Ops Challenge Committee Chair to take on a new role as WEAT Vice President. For the past seven competitions, John Bennett has worked tirelessly to lift the competition to new heights, including the ability to financially send all Texas teams to the national competition.

For more information on the Operations Challenge, please contact Jeff Sober, Operations Challenge Committee Chair, at jsober@carollo.com.

North Texas WEAT Member wins first ever Women's Saw Cut at the EI2 Texas Shootout

Belinda Champ, from Benbrook Water Authority, took first place in the first ever Women's Division at the 2010 EI2 Texas Shootout, with a winning time of 45.3 seconds.

The Texas Shootout is an annual Texas Water event where anyone can compete to determine who can cut an 8" PVC pipe the fastest. This year, a Women's Division was initiated. North Texas Section Vice President Erin Flanagan, with Freese and Nichols, stepped up to the challenge and held the lead over the other seven competitors until Belinda claimed the victory as the last competitor.

The \$5 entry fee for the event is donated to Water For People, with this year's event raising over \$250 dollars. The Men's division title for fastest saw cut went to Carl Kruger with San Antonio Water System with a time of 10.41 seconds.

Our current WEAT-NTS Secretary (and February Seminar extraordinaire), Gilbert Trejo with Malcolm Pirnie, has recently transitioned to Malcolm

Pirnie's El Paso office. Gilbert and his wife are originally from El Paso.

Gilbert will be working in North Texas part-time to complete current project assignments, while fulfilling the role of Project Manager/Client Service Manager for Municipal and Federal Clients in the El Paso area.

Gilbert has been a great asset on the WEAT-NTS Executive Committee. His boundless energy and organized approach contributed immensely to the Section's accomplishments. As Chairman of the Seminar Committee, Gilbert was the driving force behind the recent "Operators Forum - Poopers and Bloopers" seminar, which reached record levels of participation and profit.

He will be missed by all of his colleagues in North Texas.

Keep up the great work Gilbert. We are looking forward to seeing you involved in West Texas Section WEAT!

Municipal / River Authority Lab Benchmarking Survey

Do you want to know how your lab compares to other municipal / river authority labs?

The American Water Works Association Water Quality Laboratory Committee is asking for your participation in a benchmarking survey targeted to municipal and river authority laboratories. The committee is interested in gathering information on the operation of the municipal and river authority laboratories in relation to:

- Scope of Work
- Human Resources
- Laboratory Information management Systems
- Quality Control and Lab certification / accreditation
- Support activities

The goal is to determine trends in the operation of the laboratories. How do practices differ between large and small labs? Does geographical location play a factor in the operation of laboratories?

The survey is expected to take 20 minutes to complete. Everyone who completes the survey will receive a copy of the results. All responses are confidential.

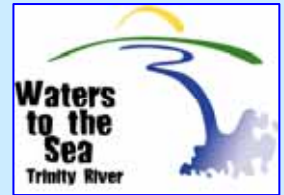

Dates of Survey: May 1 – June 12th

Website: <http://www.surveymonkey.com/s/awwalabsurvey>

For more information or a copy of a paper survey, please contact:

Elizabeth Turner
Chair, AWWA Water Quality Lab Committee
Elizabeth.Turner@dallascityhall.com

What's the Story?

It's hard to believe that it's been 5 years, 4 months and a *handful of days* since the initial meeting. Some of you may remember that on January 26th 2005, twenty-seven (27) individuals, representing 16 Metroplex based agencies and organizations, gathered in a small conference room at the River Legacy Living Science Center in Arlington to learn about the international award winning classroom teaching resource: ***Waters to the Sea (WTTS)***. The purpose of that meeting was to ascertain if there was a significant level of interest in developing a Trinity River version *WTTS*. I don't think anyone anticipated the long and winding road that lay ahead.

That's why I am especially happy and honored to pass along this announcement from the producers: *The WTTS: Trinity River program will be completed.... and distributed to all program sponsors in July (2010)*. The distribution marks the completion of Phase I. I encourage everyone to take a few minutes to go on-line and check it out (beta version) @ <http://cgee.hamline.edu/waters2thesea/Trinity>.

Latest Developments:

It's truly an exciting time for ***Waters to the Sea- Trinity River (WTTS-TRINITY)***. It's truly an example of *being at right place at the right time*.

- The recent adoption of new state education standards is forcing school districts to re-write their curriculum. The science curriculum specialists from Fort Worth ISD and Grand Prairie ISD are familiar with WTTS and they are both enthusiastic about possibility of incorporating it as part of the new required curricula.
- Public awareness/ interest in the watershed is high, spurred by visible progress on the Trinity Corridor Development Project and a well funded marketing campaign for ***KERA Channel 13's latest documentary: Living with the Trinity A River's Story***.
- The project team from Hamline University- Center for Global Environmental Education (***CGEE***) has fostered strong relationships with key community organizations, including ***KERA-Channel 13, River Legacy Science Center, Trinity River Audubon Center, and the Fort Worth Nature Center***.

(continued on page 7)

Congratulations to all the recipients of the following awards received at Texas Water 2010 this year in Corpus Christi, Texas.

AWARD	Name
Arthur Sidney Bedell	Brad Castleberry
Lifetime Achievement	Desmond Lawler
Municipal Plant of the Year - Category 1 (< 1 MGD)	Peninsula WRP - UTRWD
Municipal Plant of the Year - Category 2 (1-15 MGD)	Salatrillo - SARA
Municipal Plant of the Year - Category 3 (>15 MGD)	TRA CRWS
Emerging Leader	Meera Victor
William D. Hatfield	Clifford Beaber
Winfield S. Mahlie	Raj Bhattarai
Sidney L. Allison	NTMWD
Ronald B. Sieger Biosolids Management	Hornsby Bend
Outstanding Municipal Operator of the Year	Raudel Juarez
Exemplary Employer	SAWS
Laboratory Analyst Excellence	Dana White
George W. Burke, Jr.	CC Whitecap
Medal of Honor for Heroism	Paul Baumgardner
WEAT Recruitment Award	Dennis Laskowski
WEAT Recruitment Award	Sharon Miller
Outgoing President's Award	Betty Jordan

(continued from page 6)

What's Next ?

Completion of the CD and preliminary Teachers Guide represents a major milestone; an essential component of the original Vision statement:

Waters to the Sea-Trinity River will be....

- Acknowledged and commonly recognized as the exemplary watershed outreach and education resource for the Trinity River basin.
- Readily available, widely distributed and effectively utilized in schools, nature centers, museums, libraries and other public information networks throughout the Trinity River basin.

If you're interested in learning more about the product and/or have ideas about future **WEAT involvement with and support of** this exemplary program, please contact Karen Bick (214) 665-7539 or bick.karen@epa.gov.

CH2M Hill Scholarship Fundraiser Challenge

By now many of have seen (and hopefully participated in) the WEAT Scholarship Committee's "Change for the Future" fundraising efforts. Our particular interest at CH2M HILL was to honor Ron Sieger who sadly passed away several years ago. Ron was a valued, well liked and long-term employee as well as an integral part of WEF/WEAT/NTS activities over the years and a highly respected expert in our profession.

We held a fundraiser in our Dallas and Fort Worth offices for the Ron Sieger Endowment Fund with a \$500 match for employee contributions. We're happy to report that change, cash and checks filled the containers over the course of two weeks during luncheon meetings and folks stopping by the office. We celebrated the addition of \$1,167.24 to Ron's Endowment Fund with an ice cream party in each office.

More ideas are coming forth by the committee members on ways to build the related scholarship funds to serve our WEAT members and help their dependants gain a college education. We hope you'll support the fundraisers in your office, WEAT or Section meetings. It's a great investment for our members and profession's future!! If you would like to help or learn more about the scholarship program, please contact Cheryl Smith at WEAT headquarters: 512.693.0060.

First Annual Sporting Clays Tournament is a Success!

On March 19, 2010, 140 WEAT members convened at the Alpine Shooting Range in Fort Worth, Texas to participate in the 1st Annual WEAT North Texas Section Sporting Clays Event. The event was a tremendous success, with over 110 shooters participating. Thirty volunteers made sure that the event ran smoothly and safely.

If you are not familiar with Sporting Clays, it is “golf with a shotgun.” Teams of 4 or 5 shooters walked around a course of 12 shooting stations. At each station, team members took turns in shooting at clay targets thrown into the air. Each shooter shot at 100 targets over the full course, with a maximum score of 100.

Participants ranged from first-time shooters having fun to experienced shooters who were competing for the trophies. All participants enjoyed a BBQ lunch catered by Ken Moore.

Shooters line up at the station.

Claudia Gorgi takes shooting lessons from Jeff Sober

Team Wascally Wabbits from Hartwell Environmental survey the next challenging station.

Rebecca Rasor takes a shot while teammates Matt Tanner, Ramon Miquez, and volunteer Brigit Afshar look on..

The following awards were given:

- First Place Team: Prime Controls

Jim McMilon, Gary Anglin, David Smith, Jace McNeil

Continued on Page 9

Continued from page 8

- Second Place Team: Carollo Engineers

Rudy Kilian, Kevin Willey, Mark Evers, Robert Mikel, James Ray

- Third Place Team: Flo-Tec
- First Place Individual: Gary Anglin (From Team Prime Controls)

Gary Anglin receives his first place individual award from Darryl Corbin

- Second Place Individual: Mark Evers (From Team Carollo Engineers)
- Third Place Individual: Tom Herrin (From Team Cool Clear Water (BH&A))

A big thank you to our sponsors: Ace Pipe Cleaning, Alpha Testing, Archer Western, Carollo Engineers, CF Engineered Equipment, CP&Y, DFW Mid-Cities Chapter of TSPE, Environmental Improvements, Flo-Tec, Freese and Nichols, Odessa Pumps, Premier Chemicals, Prime Controls, Seepex, Texas Lime Co, Treatment Equipment Company, Victaulic, and Wilo Pumps.

The event raised a profit of \$6,766. This will be divided between the WEAT North Texas Section scholarship fund, the Darryl Hall Scholarship Fund, and Water for People. With the huge success of this year's event, the WEAT-NTS Sporting Clays event will be one that we can look forward to in 2011.

For information on sponsoring next year's event, please contact Jeff Sober at jsober@carollo.com

PLEASE SIGN UP TO RECEIVE EMAIL NOTICES OF EVENTS AND MEETINGS.

EMAIL hingram@cpyi.com
TO BE ADDED TO THE LIST.

THESE NOTICES GO OUT WELL IN ADVANCE OF THE MEETINGS AND ALSO SERVE TO NOTIFY OF EVENTS AND CHANGES.

YOU'LL RECEIVE ABOUT 3 EMAILS EVERY OTHER MONTH.

Science Fair Events

The North Texas Sections of WEAT and TAWWA have again joined forces to support the Dallas and Fort Worth Regional Science and Engineering Fairs. WEAT and TAWWA's support of the science and engineering fairs are one of the many ways our organizations serve the community at large.

2010 Fort Worth Regional Science Fair Winners

Senior Division:

1st Place: Andrew Sargent, Harmony Science Academy, Fort Worth, Project Title: How Clean is Our Water

2nd Place: April Eccher, Krum High School, Krum, Project Title: Water Bottle Bacteria

3rd Place: Olivia Gensheimer, RL Pascal High School, Fort Worth, Project Title: The Effect of The Level of pH in The Soil of a Plant on Height, Color and Nutrients

Junior Division:

1st Place: Anuka Dhakal, Harmony Academy, Euless, Project Title: An Efficient And Cheap Way to Clean Arsenic from Drinking Water

2nd Place: Ben Bills, Granbury Middle School, Granbury, Project Title: The Effects of Phosphates on Algae Growth

3rd Place: Christopher Pitts, Harmony Science Academy, Euless, Project Title: The Effect of Greywater on Tagetes Patula

2010 Dallas Regional Science and Engineering Fair Winners

Senior Division:

1st Place: Ritish Patnaik, Clark High School, Plano, Project Title: Slaughter in the Water: Testing the Effects of Pollutants on Aquatic Organisms

2nd Place: Sanju Eswaran and Iris Zhuang, Clark High School, Plano, Project Title: Cry Me a River: Cleaning Up the Troubled Waters of the Trinity River

3rd Place: Daisuke Takeda, Smith High School, Carrollton, Project Title: Algae as a Biofuel

Junior Division:

1st Place: Siva Manivasagam, Rice Middle School, Plano, Project Title: The effect of a cathode catalyst in a microbial fuel cell

2nd Place: Sam Yoo, Rice Middle School, Plano, Project Title: The Effect of Different Food Enzymes on the Biodegradation of Oil Spills

3rd Place: Dejaleigh Washington, Irma Rangel Ywl School, Dallas, Project Title: Fighting Grime All the Time

Congratulations to all the students. We have invited the students to bring their science projects and their parents/teachers to the May WEAT meeting at the Texas Star Golf Course and Conference Centre.

Many thanks to the WEAT/AWWA volunteers who supported the Dallas Regional Science and Engineering Fair: Katie Livas, Yuna Kim, James Howard, Gabe Trejo, Arthi Krubanandh, Ken Johnson, Bonnie Braganza, Aimee Wilson, Sala N. Senkayi, Mary Clyburn, Jason Cocklin, Carlos Flores, Ashley Howard, Jack Arias, and Terry Burton for serving as judges; the Fort Worth Science Fair: Amy Robinson, Michael Roser, Buster Fichera, Charly Angadicheril, Clay Rahn, Ty Harvey, Hayley Six, Connie Dunn, Kehinde Oshodi, Farida Goderya, and Lee Head for serving as judges.

Take Note

Please Take Note of the Following Announcements

Charles (Chad) Morris has joined the Black & Veatch Dallas office as a senior instrumentation and controls engineer. Mr. Morris has over 11 years of experience in instrumentation, control and electrical design and served as an engineering manager/project manager in Black & Veatch's Phoenix office. His responsibilities included configuration projects for remote facility SCADA installations consisting of over 220 sites. In addition, he has served as client liaison for major water and wastewater treatment plant instrumentation and controls for clients in Arizona and California.

Mr. Morris holds a bachelor's degree in electrical engineering from Arizona State University. He is active in the Boy Scouts of America and youth sports.

Thank You from a WEAT-NTS Scholarship Winner

My name is Jordan McIntyre and from 2005 to 2009, I received the scholarship from WEAT-NTS. I'd like to take this opportunity to thank WEAT, my fellow Aggie David Jackson, and everyone involved for granting me that scholarship. Last year, I graduated from Texas A&M University with a degree in Genetics, and I now currently work for Texas A&M Health Science Center where I do research in Developmental Biology. I'm very grateful to WEAT-NTS for helping to grant me the opportunity to do something I love. Thank you all so very much.

Jordan McIntyre
Class of 2009

2010 WEAT-NTS Scholarship

It's that time of the year to start sending in applications for the 2010 WEAT-NTS Scholarship. Applications must be sent in by 5:00 p.m., August 13, 2010. Please see the website: www.weat-nts.org and click [here](#) for the application. Also, please contact David Jackson if you have questions.

Daryl Hall Scholarship

The Daryl Hall Scholarship fund has recently achieved several of its near-term goals for overall fund balance and we are readying the standard application forms! Be on the lookout for the first ever 2010 Daryl Hall Scholarship application form, which will be available this June for an August 13, 2010 submittal!

The Daryl Hall fund scholarship will benefit those in our industry who are involved in collections, operations, maintenance, pretreatment and laboratory services for wastewater providers in the WEAT North Texas Section area.

The scholarship will be awarded to students who are seeking a technical or associates degrees from approved two-year colleges and technical degree programs.

SAVE THE DATE....
